

Reparations

Research Scientist, MIT Whistleblower

Third year of being screwed over by MIT and
Governor Maura Healey's kangaroo court.

John Deutch published 124 “Policy” papers.

Not one of them draws upon any
science or engineering research at
MIT.

MethaneSat has been **sabotaged**.

It did not “lose contact”. It was showing visual evidence of methane emissions.

Dream Team Advisory Council

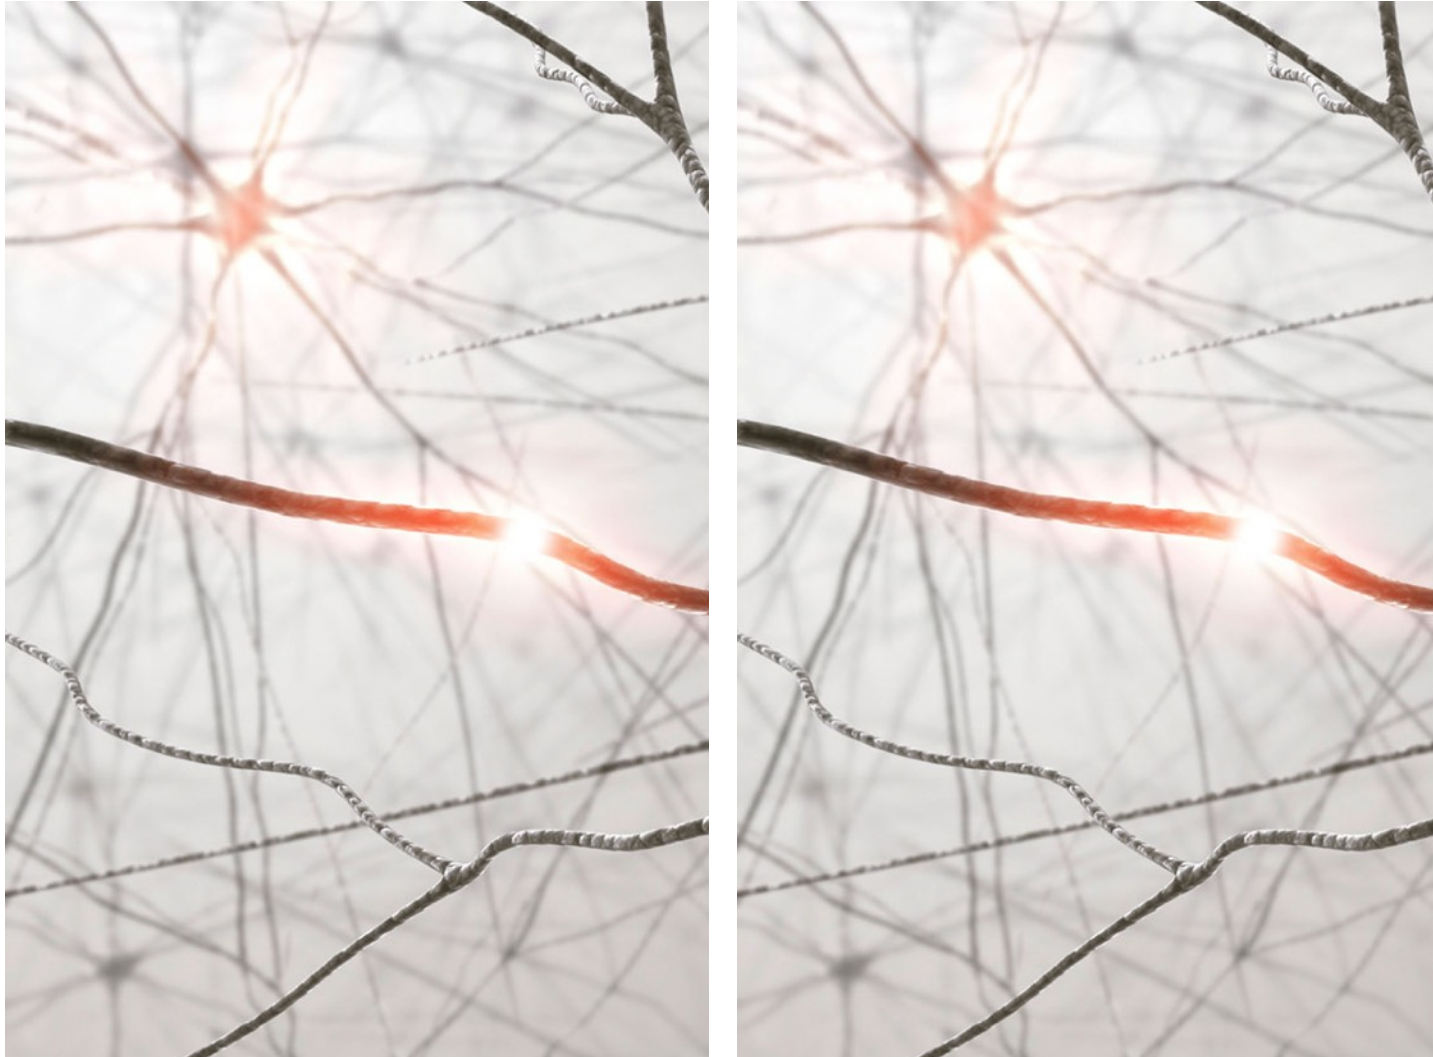

SLIDE 1

**John Deutch published 124
“policy” papers.**

Not one mentions anything to do with MIT scientific research or engineering.

Dream Team Advisory Council

SLIDE 1

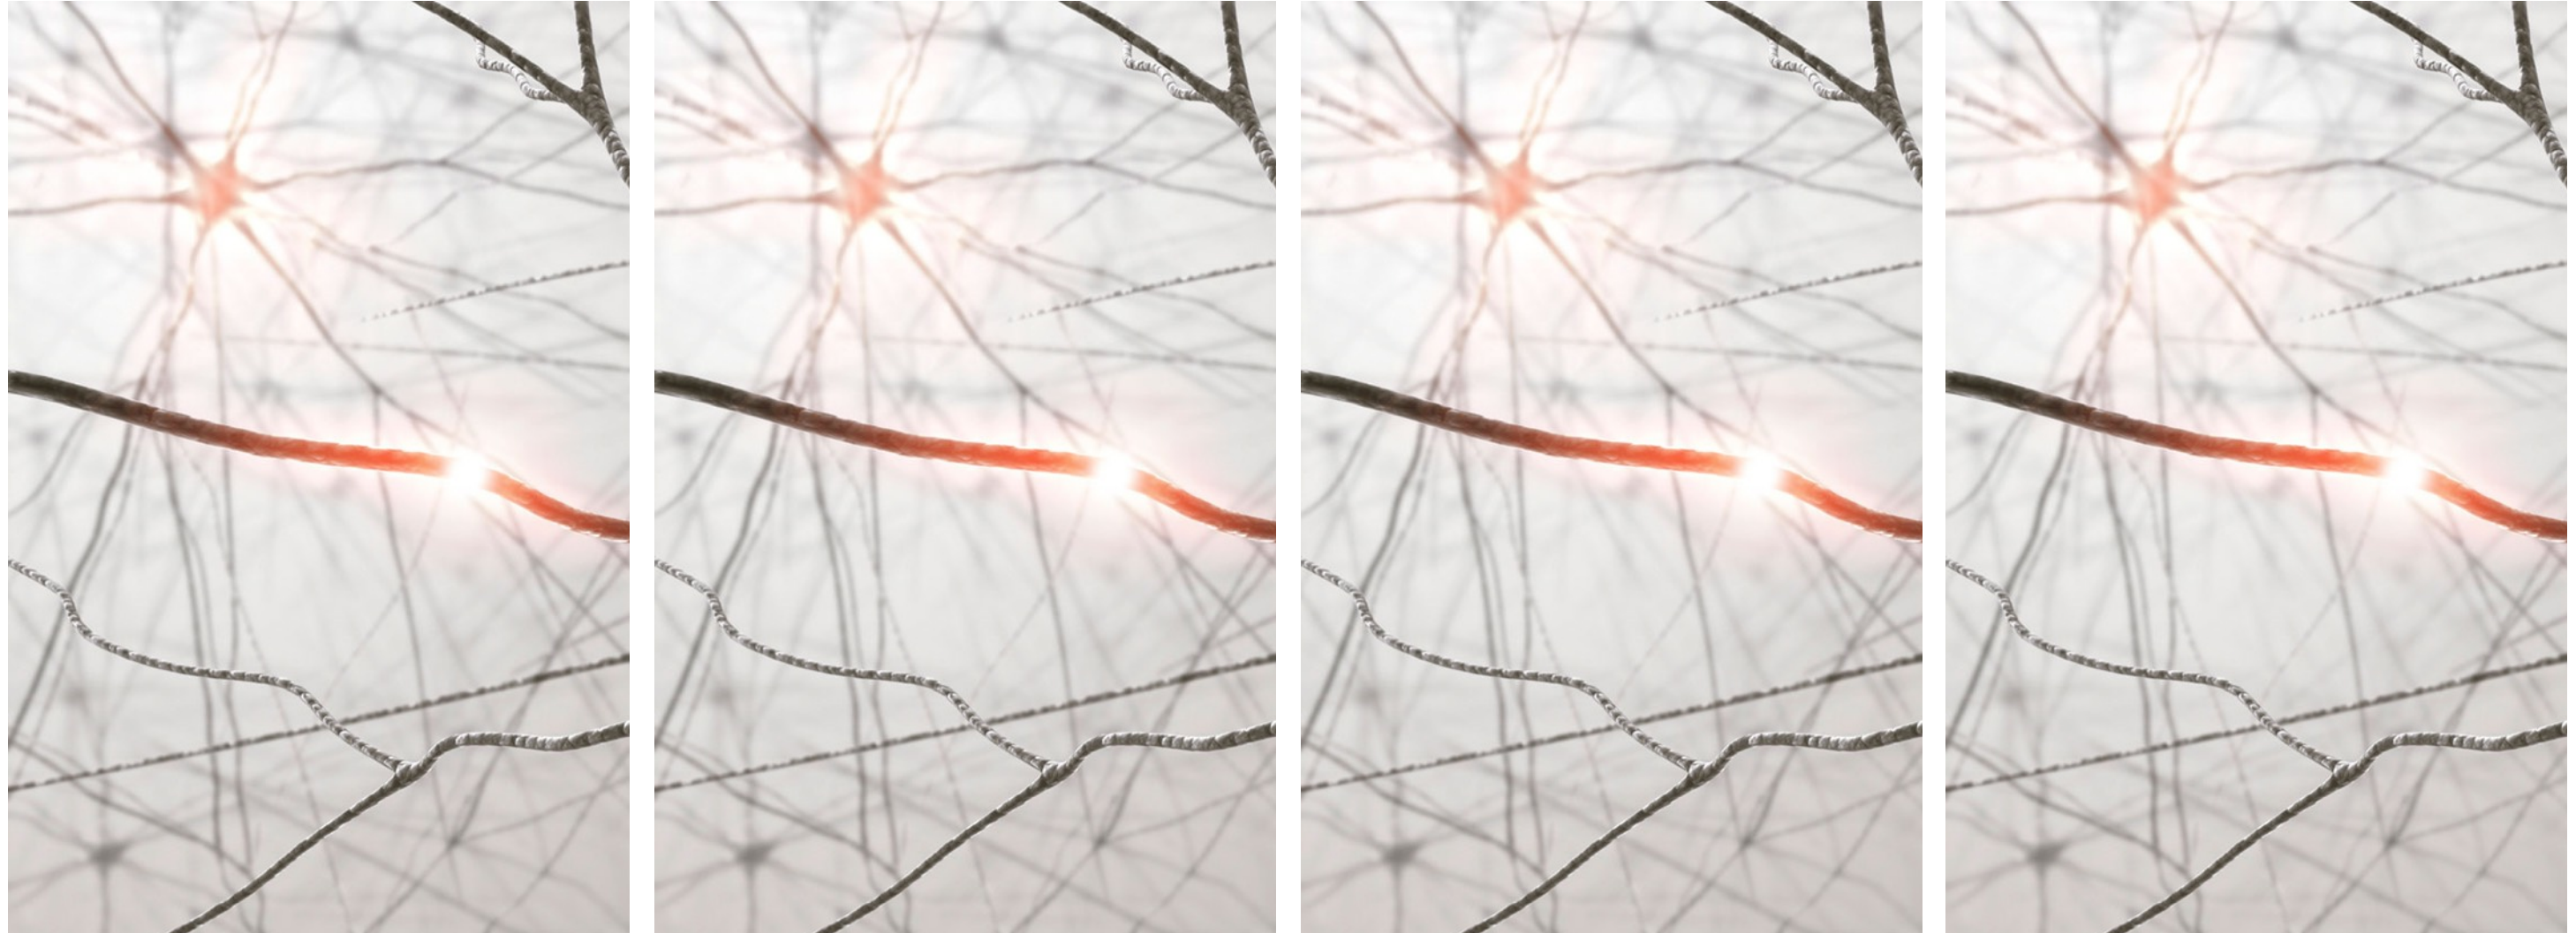

John Deutch returned to MIT in January 2000.

Not everyone was happy to see him.

MethaneSat has been **sabotaged**.

It did not “lose contact”. It was showing visual evidence of methane emissions.

Dream Team Advisory Council

SLIDE 1

Susan Hockfield resigned without warning or explanation on February 16, 2012.

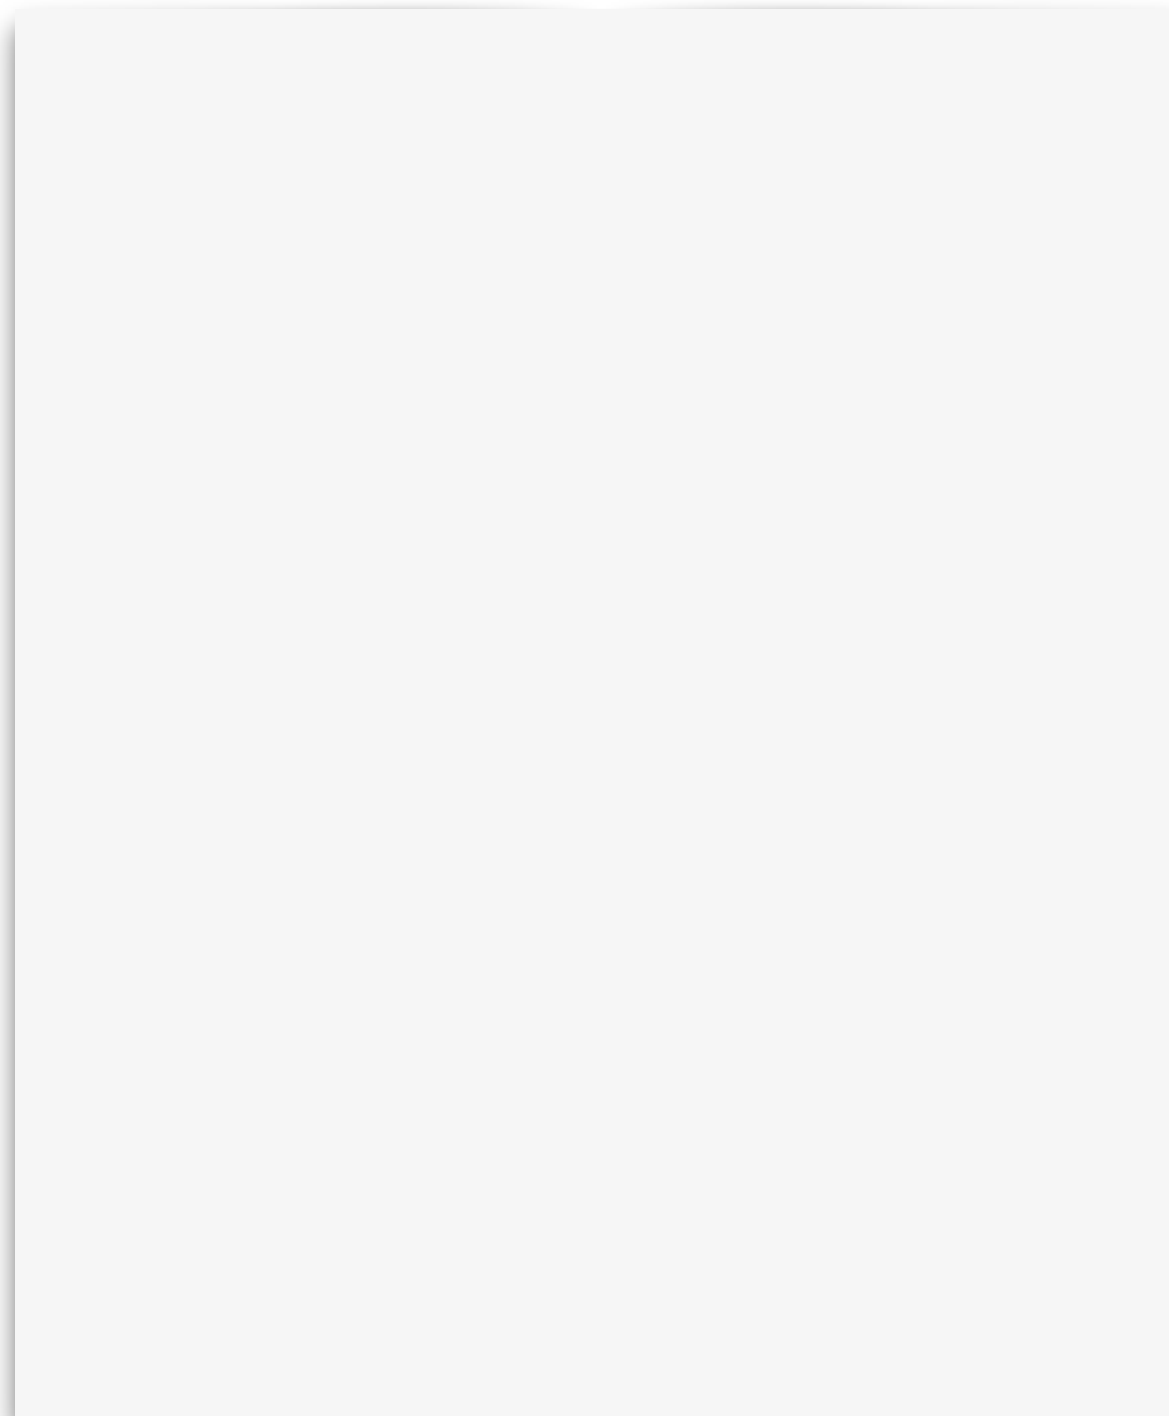

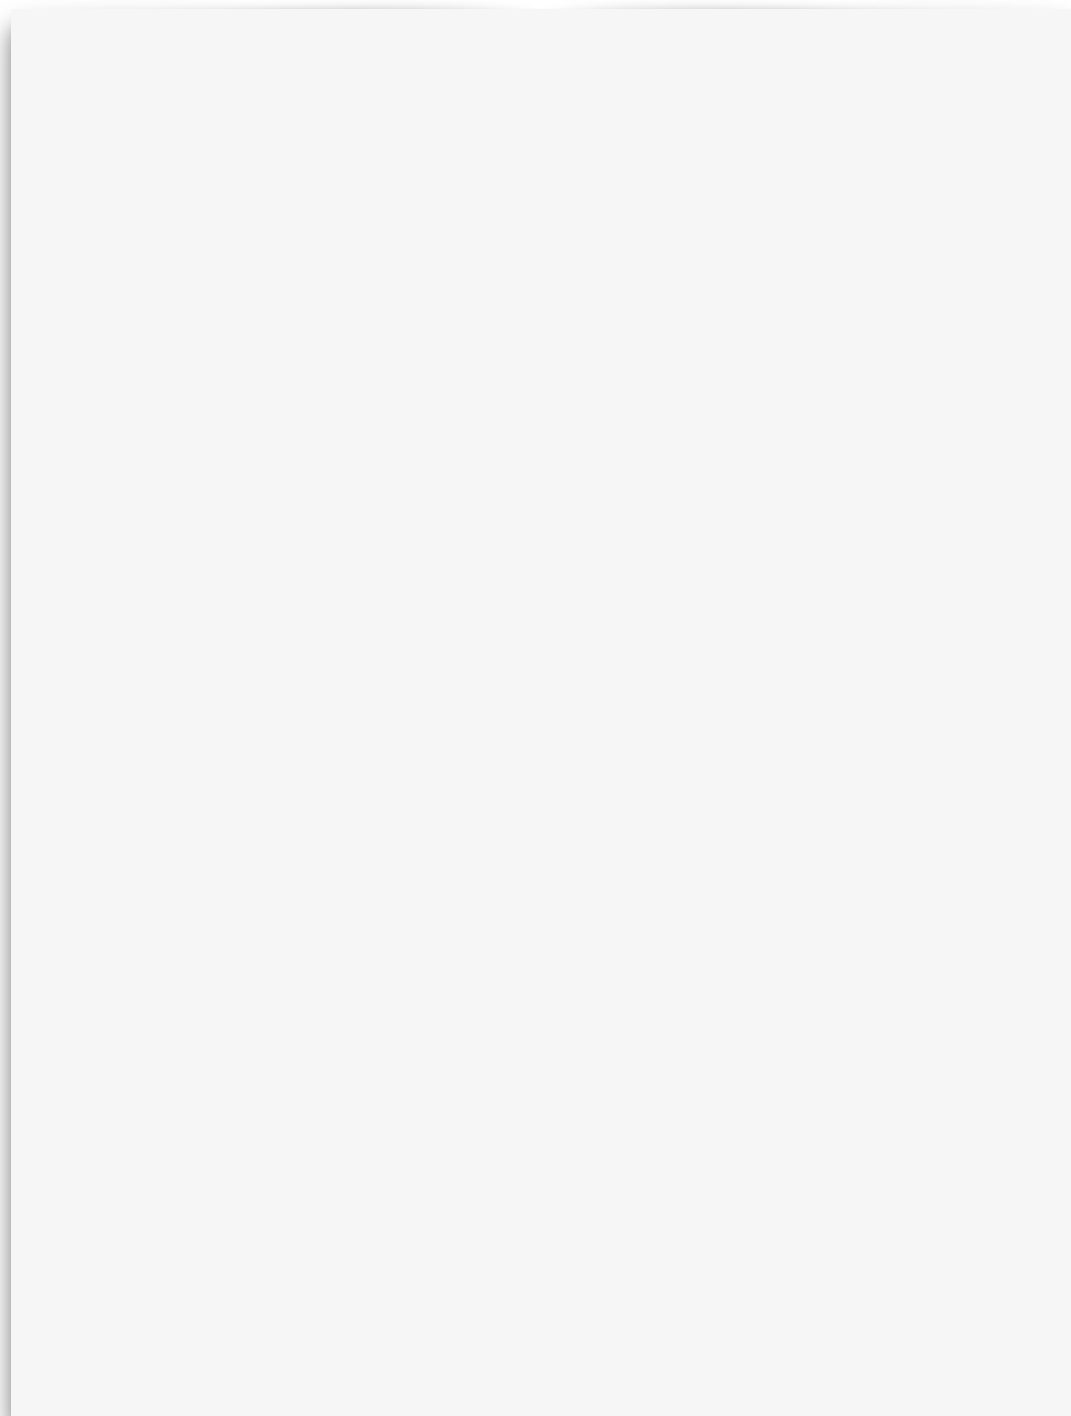

It did not "lose contact". It was showing visual evidence of methane emissions.

- Findings

Challenging idea that **climate denial** is the primary obstacle to climate action.

Climate denial is unquestionably a real thing.

APRIL 20, 2023

New report details clean energy innovation.

Activities across the Federal

By **Sally Benson**,

Deputy Director for Energy and Chief Strategist for the Energy Transition at OSTP

The National Innovation Pathway of the United States Report Highlights Federal Efforts to Make Clean Energy More Affordable and Accessible for American Households

- Today, the White House Office of Science and Technology Policy (OSTP), U.S. Department of Energy (DOE), and the U.S. Department of State released the [National Innovation Pathway Report](#), highlighting the Biden-Harris Administration's all-hands-on-deck strategy for accelerating key clean energy technology innovations.

The Administration is advancing a three-pronged approach that prioritizes innovation, demonstration, and deployment to scale the technologies the United States needs to achieve its goals of a carbon pollution-free electricity sector by no later than 2035 and a net-zero emissions economy by no later than 2050.

The report highlights the Administration's efforts across this landscape, including the DOE Energy Earthshots™ targets, funding for large demonstration projects in the Bipartisan Infrastructure Law, incentives for clean energy technologies in the Inflation Reduction Act, and more.
